In an effort to continue improving the products we offer, the following change or recommendation has been made.

Spa Models

Affected: All swim spa models with  
exercise equipment included

Effective Date: 2/02/2025

The exercise equipment system is being replaced with a better quality system.

The old system provides one set of resistance by using elastic bands that are prone to break and deteriorate over time.

The new system utilizes robust adjustable hydraulic cylinders for resistance.
