

2023 Production Changes

Garden Leisure Hot Tubs | Shoreline Spas

In an effort to continue improving the products we offer and further streamline the manufacturing process, the following changes to the Garden Leisure Hot Tubs and Shoreline Spas product lines will be instituted.

- Currently the color of the spa cover provided with each spa coordinates with the cabinet color. Gray will no longer be available so black will be provided when the spa has gray cabinets.

	Current	New
Gray Cabinets	Gray Cover	Black Cover
Black Cabinets	Black Cover	Black Cover
Brown Cabinets	Brown Cover	Brown Cover

- Currently all swims spas with the Elite cabinet option offers black corners to contrast with the side panel color. Now the corner color will match the side panel color.

- All standard spa models will now offer the K-506 full color topside control display. GL525L, GL635L, and GL630L models will be upgraded to the K-506

- The current insulation package utilizes the QL Insulation Shield(recycled denim) product as the primary insulating material. The QL Insulation Shield will be upgraded to the RMAX insulating material.

Current

- Recycled Denim/Cotton Sustainable Insulation Products
- Contributes to meeting CEC Criteria
- Elevating Energy Efficiency of the spa
- Prop 65 Compliant
- Acoustically Superior
- Thermally Efficient
- ACS1 Certified Quarterly thru Intertek
- ASTM Class A B94 for Fire & Smoke
- Protected Against Corrosion & Fungus
- Protected Against Moisture Absorption

RMAX® Heatshield™ insulation system

HEATSHIELD

- Up to 7 times the R-Value of other hot tubs on the market
- Lower operating cost
